SUPPLY CHAIN & OPERATIONS | INVENTORY, PROCUREMENT & LOGISTICS

PROFESSIONAL SUMMARY

Operations-focused professional with 3+ years of experience in dental laboratory operations, inventory and purchasing coordination, workflow scheduling, and customer support. Experienced in stock replenishment, vendor coordination, technician workload prioritization, delivery planning, billing reconciliation, and technical troubleshooting. Developing analytical skills in Excel, SQL, Python, and Tableau.

CORE SKILLS & TOOLS

Operations & Supply Chain:
Inventory monitoring and replenishment, purchasing coordination, vendor communication, workload prioritization, case scheduling, delivery routing

Business Operation:
Billing reconciliation, invoice verification, discrepancy investigation, customer coordination, technical training and troubleshooting

Tools:
Excel, SQL, Python (Pandas, NumPy), Tableau, Matplotlib

SELECTED MARKET RESEARCH PROJECT

U.S. Dental Laboratory Market Opportunity Assessment | Independent Project 2026–Present
Tableau Public Dashboard | Independent research project

- Integrated U.S. Census County Business Patterns (NAICS 339116 and 621210), population estimates, and CMS state dental expenditure data to assess the U.S. dental laboratory market.
- Compared dental practice and dental laboratory establishment trends across states, including long-term (2010–2023) and recent (2018–2023) growth, and examined population trends and market density.
- Calculated compound annual growth rates (CAGR), Growth Gap between dental practice and laboratory establishment growth, population-per-establishment ratios, and dental expenditure growth.
- Conducted county-level comparisons for selected states and documented data coverage limitations; treated establishment counts and market density as screening indicators rather than direct measures of demand, revenue, or laboratory capacity.

PROFESSIONAL EXPERIENCE

Manager & Sales Representative | Success Dental Lab **Jun 2023–Mar 2026**
Surrey, British Columbia, Canada

- Independently monitored inventory, determined replenishment quantities and purchasing schedules, coordinated supply orders, and contacted vendors about promotions and product information.
- Assigned daily tasks and prioritized technician workloads based on case requirements and delivery deadlines; monitored case progress and coordinated schedule adjustments when needed.
- Trained technicians on new equipment, technologies, and laboratory workflows, and provided day-to-day technical support by troubleshooting equipment and workflow issues or consulting technical support teams when needed.
- Reconciled monthly billing totals against individual case invoices, investigated discrepancies such as misattributed dentist records and pricing changes, and corrected billing records.
- Monitored monthly revenue by dental practice and dentist, identified noticeable changes in billing activity, and shared observations with the owner.
- Served as the primary point of contact for dental practice accounts, explaining laboratory processes and technical options, handling case consultations, and communicating customer requirements to the owner.

- Coordinated customer deliveries based on owner-defined priorities, planning routes and handling direct deliveries for key accounts while using third-party services for other locations.

Sales Representative | Success Dental Lab
Oct 2022–Jun 2023

Surrey, British Columbia, Canada

- Supported dental practice accounts through case coordination, customer communication, and direct visits to introduce company services.
- Confirmed case readiness ahead of patient appointments and coordinated scheduling discrepancies and urgent requests.
- Monitored inventory levels and coordinated weekly or biweekly supply orders.
- Planned delivery routes based on dental practice locations and personally delivered completed cases to customer accounts.

Team Leader | IKEA
Apr 2022–Jul 2022

Coquitlam, British Columbia, Canada

- Coordinated incoming inventory with the Logistics department, verified delivery quantities, and identified missing deliveries.
- Assigned daily tasks, monitored stock levels, and prepared ingredients in advance to help prevent operational disruptions.
- Monitored team adherence to procedures and recommended more efficient work methods when appropriate.

SELECTED PROJECT

U.S. Dental Laboratory Market Opportunity Assessment | Independent Project
2026–Present

- Analyzed U.S. dental practice (NAICS 621210) and dental laboratory (NAICS 339116) markets using Census business and population data.
- Compared establishment growth (CAGR), population trends, and market density across selected states and counties; documented data coverage limitations.
